PROFESSIONAL SUMMARY

Full-stack Software Engineer with hands-on experience across frontend, backend, and database development. Builds solutions and diagnoses problems efficiently. Collaborates closely with cross-functional teams and pays close attention to detail. Maintains a constant drive to stay up on the newest innovations in the field. Bilingual (English/Spanish).

EXPERIENCE

Software Engineer I **April 2025 – Present**
MEDsys Software Solutions | Perrysburg, OH (Remote)

- Develop and maintain full-stack features across a HIPAA-compliant healthcare platform serving multiple home care agencies, using C#, ASP.NET, JavaScript, and SQL Server.
- Build and enhance reporting tools, data entry forms, and billing/invoicing workflows to support operational teams.
- Resolve production tickets with QA, identifying root causes, proposing fixes, and tuning slow SQL queries.
- Collaborate with business stakeholders to translate operational needs into features, within an Agile environment using Jira and Confluence.

Software Developer Intern **January 2025 – April 2025**
Local Chef | Orlando, FL (Remote)

- Developed features for a startup product as part of a small, fast-paced engineering team.
- Helped build user authentication and payment integration for the platform.

Software Developer Trainee **June 2024 – September 2024**
Revature | Reston, VA (Remote)

- Completed a structured Agile software development training program covering the full development lifecycle.
- Applied code quality practices including testing, continuous integration, and version control.

EDUCATION

Bachelor of Science in Computer Science **August 2018 – December 2022**
University of the Virgin Islands | St. Thomas, USVI

CERTIFICATIONS

AWS Cloud Quest: Cloud Practitioner – Amazon Web Services | Issued Apr 2026

Microsoft SQL Server Specialization – Microsoft | Issued Feb 2026

AWS Academy Cloud Foundations – Amazon Web Services | Issued Sep 2022

TECHNICAL SKILLS

Languages & Frameworks:	C#, ASP.NET, Entity Framework, JavaScript, TypeScript, React, Next.js, HTML, CSS
Databases & Cloud:	Microsoft SQL Server, MySQL, Amazon Web Services, Azure
Development Practices:	REST APIs, CI/CD, Unit Testing, Docker
Tools & Methodologies:	Git & Version Control, Agile, Jira, Confluence, Performance Optimization, API Design

PROJECTS

ArtifyMe github.com/tomyRomero/artifyme
React Native, Expo, TypeScript, ASP.NET Core, SQL Server, Python, FastAPI, Stable Diffusion

- Built a mobile app that turns hand-drawn sketches into AI paintings, using a Python FastAPI service running Stable Diffusion with ControlNet on a cloud GPU.
- Designed an ASP.NET Core API that runs each painting as a tracked background job with live progress and push notifications, plus rotating refresh tokens and private S3-compatible cloud storage.

StoreOperations github.com/tomyRomero/StoreOperations
Next.js, React, TypeScript, ASP.NET Core, Entity Framework Core, SQL Server, Stripe, Tailwind CSS

- Built an online store with guest and account checkout and an admin console for orders, products, customers, and live-preview theming.
- Integrated Stripe payments and Stripe Tax with webhook-confirmed orders and a transactional email outbox; tested with xUnit and Testcontainers in CI, plus Playwright end-to-end tests.

Sparks github.com/tomyRomero/sparks
Next.js, React, TypeScript, ASP.NET Core, SQL Server, SignalR, TanStack Query

- Rebuilt a social network for creative ideas on ASP.NET Core and SQL Server, with AI-assisted drafting, threaded comments, and live messaging over SignalR.
- Built authentication from scratch (BCrypt, JWTs, rotating refresh tokens, lockout, rate limits), with integration tests on a real SQL Server and Playwright in CI.
